

Dr. Kirti is a Post Doctoral Fellow at Indian Knowledge System and Mental Health Applications (IKSMHA) Centre, IIT Mandi . Her research interest lies in biomedical signal processing and VLSI Designing. Her passion for research is evident through her publications in esteemed journals and conferences, focusing on advancements in ECG processing and heart rate variability analysis. She is also a member of IEEE and ACM community. Currently, she is conducting research on how yoga can mitigate academic stress and enhance well-being among college students, demonstrating the practical applications of ancient practices in today's educational environments.
